

## How to use the reports in GMC Data Explorer (mobile)

GMC Data Explorer has been developed using Microsoft Power BI.

The image on the second page, below, provides guidance on what features are available, and how to use the reports, while using Data Explorer on a mobile device.

For any queries about how to use the tool, you can email [insightandresearch@gmc-uk.org](mailto:insightandresearch@gmc-uk.org) and we will reply to you directly.

**Slicers** which can be found at top of some mobile reports. Use these to filter the data in the report. All changes you make on the slicers will be retained if you export data.

Use the **“Show by”** dropdown to see a list of options by which to review data in the report.

These **in-report buttons** will navigate to related reports, which may be of interest.

Scroll down to the footer and tap to open our **feedback form** and send us your comments.

Tap here to see our detailed guidance on how to **download data**.

Click on this button to access the **main menu**. This allows you to navigate to all six sections of Data Explorer.

Tap on a chart, table, or map to see an **“ellipsis”** (three dots). Click on this to see a list of **“More options”**. You can then click **“Export data”** to export the data for that visual or click **“Show as table”** to show the data as a table instead.
